

SCHEDULE 1

REGULATIONS FOR USE OF THE PIERS ISLAND PARKING COMPOUND

Vehicle Parking

During the peak period, June 15th - September 15th, each property is entitled to a compound parking pass for one motor vehicle. During the non-peak period, September 15th - June 15th, a seasonal pass is available from the parking trustee or designate to permit a second vehicle.

All cars and trucks must display a valid Piers Island compound parking pass and current road licensing. Parking passes are available upon request from the parking trustee or designate.

All vehicles should park within designated markings.

Vehicles with trailers attached must park within the designated area on the west side of the lot.

Boat Trailer Parking, Long Term

One boat trailer per property may be stored in the compound if space is available within the designated area. Stored boat trailers must display a valid road license.

Boat trailers must be detached and suitably parked within the area designated for boat trailer parking. Tandem axle boat trailers, boat trailers longer than 20 feet, and locked boat trailers must be parked against the west (rear) fence so as to not block smaller units.

Boat trailer owners storing detached boat trailers must contact the parking trustee or designate to provide ownership and license plate information. At that time they will receive a PIID boat trailer decal to be affixed to the unit.

Boat Storage

Boats may not be stored in the compound on blocks, nor on boat trailers except for a period long enough to accommodate tide levels and weather for launching purposes.

Boats must be stored in boat racks and owners must contact the Piers Island administrator to arrange payment of the annual fee. Boats must display owner's lot number. *

Materials In Transit

The compound is not to be used for long term storage of materials and no garbage or debris is to be left in the compound.

Materials awaiting transport to the island may be left in the compound for no more than ten days. The only exception would be for adverse weather. Materials awaiting transport must display the owner's lot number. *

At all times, materials must not obstruct boat launching, or the movement/parking of vehicles.

Storage Shed

Shed keys are available from the parking trustee or designate upon request.

All articles stored in the storage shed must display the owner's lot number. *

Compound Security

One gate key will be issued for each property upon request to the parking trustee or designate. Additional or replacement keys are available for a fee.

Compound users must ensure that all gates are locked upon leaving.

Enforcement of Regulations

All vehicles and materials left in the compound in violation of these regulations are subject to removal and impoundment at owner's expense.

* A supply of tags is available beside the door of the storage shed.
