

## PIID Buildings & Land Improvements Trustee's Report May 2020

---

PIID Meeting – May 13, 2020

- The compound has been fairly full in the past month; a possible result of the covid-19 situation and the nice days coming back. I would like to remind everyone to follow the compound regulations. Starting June 15<sup>th</sup>, only year-round passes are valid in the compound. If the trailer area or parking lot is full, please plan to have an alternate solution to store or park your trailer while you are visiting Piers to keep the access as equitable to all islanders as possible.
- Compound Committee: BC Hydro has completed their assessment and design to provide a 400amp service to the compound. The quote is \$2,562 and was approved by the Trustees. BC Hydro will proceed with the work no earlier than July. The Compound Committee is currently working on other details as it relates to electrical work, bylaw updates, gate solutions and other components discussed in the compound proposal. More details will be shared with the Trustees when available for consideration and approval.
- Other tasks include issuing and replacing parking passes, and other communications with islanders.
