

2000 Square foot
Asphalt Apron Estimate

Estimate provided by O.K. Industries.

Installation of 3 inches thick of material, trucking and site prep estimate comes to \$15,500 for 2000 square feet, so \$7.75 per square foot.

Barging and seal coating not included.

Barging estimate for Asphalt trucking and equipment is \$1800.00-\$2000.00

Seal coat roughly \$1000.00 and should be done every 5 years for the climate we live in.

Asphalt typically last 15-20 years, its cheaper to install, but typically does not last as long as paving stones or concrete. Higher maintenance when dealing with possible cracks and holes coming from unmaintained cracks.

Of course, the life of the surface all depends on the care provided.

The better care the longer it will last.

Below are 2 more size options based off the \$7.75 per square foot quote.

2400 square feet would be \$18,600

3000 square feet would be \$23,250.00
