

## WILDFIRE PROTECTION RESOURCES – August 2022

PIVFD spends countless hours training for all types of fire situations, but the reality is, in the event of a wildfire our resources are limited and there is a lot you can do to protect your own property. FireSmart work around the residence is very important, but there is more you can do. We supply this list of resources if you want to go the extra miles and supply and install your own sprinkler protection. Set it up in the summer and leave until the rainy season begins. We offer these suggestions for you:

-  Deploys in minutes, providing full 360° degree spray
-  Low water consumption
-  Operates under reduced water pressure
-  66 foot radius (33 feet on the roof, 33 feet in the yard)
-  No gutters? No problem. Kit comes with alternate attachment options.
-  Low cost, big benefits. Each kit costs under \$200. Now that's peace of mind.
-  Agricultural-grade wind-fighting sprinklers quickly and easily install using a broom handle, painter's pole or pool skimmer.

**\$14.99**

**WASP Wildfire Protection Kits are available from WASP directly or from Amazon with free shipping**  
**Rooftop Sprinklers are available from Amazon for \$58 plus \$6.96 import duties with free shipping**  
**Y Hose connectors are available at Canadian Tire for \$14.99 and most hardware stores**  
**Flat hose is also available at most marine and hardware stores. Garden hose works just as well.**

**By attaching to your own water supply, if there is pressure you will have protection, even if perhaps intermittent. In addition, with the fixtures in place, if firefighters are able to attend to your home, you have given them a head start protecting your home as they can attach to another water supply system if available.**

## Arranging your own water supply

### Protect Your Home with a Fire Pump Kit

By purchasing a fire pump kit YOU can help protect YOUR home against wildfire, augmenting efforts by the PIVFD, which can only do so much. The kit the PIVFD recommends is the **SKU: 8518250**, sold by **Princess Auto in Langford** ([princessauto.com](http://princessauto.com); 250-391-5652). This kit is currently on sale for **\$1150** (\$250 saving), a price that Princess Auto is offering to Piers Islanders until the end of August. Check out the website for kit specs, the most important one being its capacity to pump up to 7,560 GPH—a volume of water that could save your house.

#### Testimonial for the **SKU: 8518250**

**Convenient.....Works great!**

*Easy to assemble. The included cart makes it very easy to move around. Honda motors are the best! 1 pull to start every time. Great pressure even with 200' of 1 1/2" lay flat PVC hose.*

**Options:** Several other retailers in Greater Victoria offer either the same kit or a very similar kit. Sunbelt Rentals in Sidney ([sunbeltrentals.com](http://sunbeltrentals.com); 250-656-9422) has the same kit but it costs \$250 more than at Princess Auto.

#### [Portable Dry Hydrant - Bearspaw ProtectaPump](#)

**No Dock? The FireCeptor allows you to draw water right from the beach. Approx. \$1200**
